## Notation

$x$	signal in time domain
$X$	signal in frequency domain
$\boldsymbol{x}$	vector
$\boldsymbol{X}$	matrix
$S_{xx}$	power spectral density estimate for the signal $x(t)$
$S_{xy}$	cross spectral density estimate for the signals $x(t)$ and $y(t)$
$S(f) \cdot H(f)$	multiplication
$s(t) * h(t)$	convolution
$X(f)^*$	complex conjugate
$\mathcal{F}$	Fourier transformation
$ x $	modulus of $x$
$\ \boldsymbol{x}\ $	Euclidian-norm of $\boldsymbol{x}$
$\langle \rangle$	average
$\hat{x}$	estimate of $x$

## List of Symbols

$E_{\text{diffuse}}$	energy of signal component 'diffuse'
$E_{\text{free}}$	energy of signal component 'free'
$E_{\text{noise}}$	energy of signal component 'noise'
$E_{\text{reactive}}$	energy of signal component 'reactive'
$E_x$	energy of signal $x$
$N$	number of sources
$P$	source strength
$S$	room surface
$T$	reverberation time
$V$	room volume
$Z$	impedance
$\alpha_{\text{ol}}$	overlap between two blocks in percent
$\alpha_c$	decay rate for the exponential average in spectral density estimations
