Abstract vii

Acknowledgments ix

1. Introduction 1
- 1.1. The big data problem . . . 1
- 1.2. Data compression . . . 2
- 1.3. What compressed sensing is about . . . 3
- 1.4. Scientific contributions of the thesis . . . 10
- 1.5. Organization of the thesis . . . 12

2. Preliminaries and concepts 15
- 2.1. Notations . . . 15
- 2.2. Proximity operators and algorithms . . . 18

3. Data compression 25
- 3.1. What is compression? . . . 25
- 3.2. Compression and quality measures . . . 26
- 3.3. Mathematical techniques . . . 28
  - 3.3.1. ℓ_0 and ℓ_1 minimization . . . 28
  - 3.3.2. TV minimization . . . 32
  - 3.3.3. Nonnegative matrix factorization . . . 33

4. Compressed Sensing 37
- 4.1. Introduction . . . 37
- 4.2. Uniqueness, sparseness and other properties . . . 39
  - 4.2.1. Coherence . . . 41

4.2.2. Restricted isometry property 43
4.3. Stable ℓ_1 minimization 53
4.4. Stable total variation minimization 60
4.5. Coherent and redundant dictionaries 69
4.6. Asymmetric restricted isometry property 71

5. Imaging mass spectrometry in a nutshell 75
5.1. Mass spectrometry 75
5.2. Imaging mass spectrometry 77
5.3. Datasets used in this thesis 78
5.3.1. Rat brain 78
5.3.2. Rat kidney 79

6. Compression in imaging mass spectrometry 81
6.1. Introduction 81
6.2. Peak picking 82
6.2.1. Spectral peak picking 82
6.2.2. Spatial peak picking 84
6.3. Denoising 91
6.4. Nonnegative matrix factorization 92
6.5. Conclusion 97

7. Compressed sensing in imaging mass spectrometry 99
7.1. Introduction 99
7.2. The compressed sensing process 102
7.3. First assumption: compressible spectra 105
7.4. Second assumption: sparse image gradients 106
7.5. The final model 107
7.6. Robust recovery 108
7.7. Numerical results 121
7.8. Conclusion 128

8. Compressed sensing based multi-user detection 131
8.1. Introduction 131
8.2. Sporadic communication 131
8.3. Multi-user system modelling 133
8.4. The elastic-net 137

8.5. The multi-user test setup 139
8.6. A parameter choice rule: The C-curve criterion 140
8.7. An offline approach 143
8.8. Conclusion 143

9. Conclusion **147**

A. Compressed sensing results for the rat kidney **151**

B. Spatial peak picking results for the rat kidney **155**

Bibliography **157**
