Notation	1
1 Introduction	3
1.1 Motivation	3
1.2 Objectives	4
1.3 Related Work	4
1.3.1 Control Task and Communication Network Scheduling	4
1.3.2 Event-Triggered Control	8
1.4 Outline and Contributions	10
1.5 Publications	12
I Control Task and Communication Network Scheduling	15
2 Control Task and Communication Network Scheduling Model	17
2.1 Control Task Scheduling	17
2.2 Communication Network Scheduling	19
3 Output-Feedback Control and Scheduling Design	21
3.1 Modeling	21
3.1.1 Continuous-Time Model	21
3.1.2 Discrete-Time Model	22
3.2 Problem Formulation	24
3.3 State-Feedback Control and Scheduling Codesign	25
3.4 Observer Design	29
3.4.1 Prediction Observer	30
3.4.2 Current Observer	32
3.5 Separation Principle for Switched Systems	33
3.5.1 Stability Analysis	33
3.5.2 Performance Analysis	34
3.6 Illustrative Example and Comparison	35
3.6.1 State-Feedback Offline and Online Scheduling	37
3.6.2 Output-Feedback Online Scheduling	39
3.7 Experimental Studies	41
3.7.1 Two DC Motors and one Inverted Pendulum	41
3.7.2 Two Electronic Double Integrator Circuits	45

3.8	Summary	47
4	PI Control and Scheduling Design for Setpoint Tracking	49
4.1	Problem Formulation	49
4.2	PI Control Structure	50
4.3	Online Scheduler	53
4.4	Control Synthesis	54
4.5	Stability Analysis	58
4.5.1	Closed-Loop System Model	58
4.5.2	Stability criterion	59
4.5.3	References and Disturbances	62
4.6	Illustrative Example and Comparison	62
4.6.1	Related Scheduling Approaches	63
4.6.2	Evaluation	63
4.7	Experimental Study	68
4.8	Summary	70
II	Event-Triggered Control	73
5	Event-Triggered PI Control	75
5.1	Problem Formulation	75
5.2	Event-Triggered PI Control Synthesis	78
5.2.1	Control Synthesis for Control Input Based Event-Triggered PI Control	79
5.2.2	Control Synthesis for Output Based Event-Triggered PI Control	83
5.3	Practical Stability Analysis	86
5.3.1	Practical Stability Analysis for Control Input Based Event-Triggered PI Control	87
5.3.2	Practical Stability Analysis for Output Based Event-Triggered PI Control	89
5.4	Illustrative Examples and Comparisons	90
5.4.1	Related Event-Triggered PI Control Approaches	90
5.4.2	Evaluation	92
5.5	Experimental Study	100
5.6	Summary	107
6	Conclusions and Outlook	109
6.1	Conclusions	109
6.2	Outlook	110
III	Appendix	113

A Supplementary Material	115
A.1 Discretization of the Cost Function	115
A.1.1 For Control and Scheduling Codesign (Chapter 3)	115
A.1.2 For PI Control and Scheduling (Chapter 4)	116
A.1.3 For Event-Triggered PI Control (Chapter 5)	118
A.2 Measurement of the Execution Times of the Experiment in Section 3.7 .	119
A.3 Control Design for the Related Methods of Scheduling of PI Control Tasks	119
A.4 Control Design for the Related Methods of Event-Triggered PI Control .	120
A.4.1 Guaranteed Cost PI Control for Discrete-Time Systems	121
A.4.2 Guaranteed Cost PI Control for Continuous-Time Systems	121
Bibliography	123
Zusammenfassung	133
Curriculum Vitae	136
