

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Active particles in general . . . . .	1
1.2	Biological microswimmers . . . . .	3
1.3	Artificial self-propelled colloidal particles . . . . .	6
1.4	Tactic behavior of microorganisms . . . . .	10
1.5	Motivation of this work . . . . .	14
<b>2</b>	<b>Non-Gaussian statistics for the motion of self-propelled Janus particles: experiment versus theory</b>	<b>35</b>
<b>3</b>	<b>Swimming path statistics of an active Brownian particle with time- dependent self-propulsion</b>	<b>63</b>
<b>4</b>	<b>Dynamics of a deformable active particle under shear flow</b>	<b>91</b>
<b>5</b>	<b>Brownian motion and the hydrodynamic friction tensor for colloidal par- ticles of complex shape</b>	<b>117</b>
<b>6</b>	<b>Transport powered by bacterial turbulence</b>	<b>129</b>
<b>7</b>	<b>Circular motion of asymmetric self-propelling particles</b>	<b>145</b>
<b>8</b>	<b>Can the self-propulsion of anisotropic microswimmers be described by using forces and torques?</b>	<b>165</b>
<b>9</b>	<b>Gravitaxis of asymmetric self-propelled colloidal particles</b>	<b>187</b>
<b>10</b>	<b>Conclusions</b>	<b>211</b>
	<b>Appendix</b>	<b>217</b>
	<b>Bibliography</b>	<b>221</b>
