

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Notation and preliminary results</b>	<b>15</b>
2.1	Basic notation . . . . .	15
2.2	Measure theory . . . . .	16
2.3	Functions of bounded variation . . . . .	20
2.4	$\Gamma$ -convergence . . . . .	24
2.5	Slicing . . . . .	26
<b>3</b>	<b>Some preparatory work</b>	<b>29</b>
3.1	An optimization problem . . . . .	29
3.2	A relaxation result in the space $BV(\Omega)$ . . . . .	32
<b>4</b>	<b>Eigendamage: An Eigendeformation Model for the Variational Approximation of Cohesive Fracture: The one-dimensional case</b>	<b>45</b>
4.1	Setting of the problem and main results . . . . .	45
4.2	Compactness . . . . .	49
4.3	Estimate from below of the jump part . . . . .	53
4.4	Estimate from below of the volume and Cantor terms . . . . .	56
4.5	Estimate from below of the $\Gamma$ -lower limit . . . . .	65
4.6	Estimate from above of the $\Gamma$ -upper limit . . . . .	67
4.7	$\Gamma$ -convergence for the minimal energies with respect to $\gamma$ . . . . .	73
<b>5</b>	<b>Eigendamage: An Eigendeformation Model for the Variational Approximation of Cohesive Fracture: The d-dimensional case with pure antiplane shear deformations</b>	<b>75</b>
5.1	Setting of the problem and main results . . . . .	76
5.2	Compactness . . . . .	78
5.3	Estimate from below of the surface term . . . . .	84
5.4	Estimate from below of the volume term . . . . .	103
5.5	Estimate from below of the Cantor term . . . . .	106
5.6	Estimate from below of the $\Gamma$ -lower limit . . . . .	111

5.7 Estimate from above of the $\Gamma$ -upper limit . . . . .	112
5.8 $\Gamma$ -convergence for the minimal energies with respect to $\gamma$ . . . . .	121
<b>Appendix A Negative Sobolev spaces, embedding theorems and the flat topology</b>	<b>125</b>
A.1 Negative Sobolev spaces and embedding theorems . . . . .	125
A.2 Flat topology . . . . .	126
<b>Appendix B Convolution</b>	<b>129</b>
<b>Appendix C Convex sets and concave functions</b>	<b>131</b>
<b>List of Symbols</b>	<b>133</b>
<b>Bibliography</b>	<b>135</b>
<b>Index</b>	<b>140</b>
