

Table of Contents

Abstract	vii
Deutsche Kurzfassung	ix
1 Introduction	1
1.1 Motivation and Background	1
1.2 Problem Formulation	3
1.3 Contributions and Outline	6
2 Design of Distributed Optimization Algorithms	9
2.1 Problem Formulation	12
2.2 Saddle-Point Dynamics	16
2.3 Admissible Lie Bracket Representations	21
2.4 Construction of Distributed Algorithms	40
2.5 Discussions	52
2.6 Summary and Conclusion	58
3 Design of Robust & Structure Exploiting Optimization Algorithms	61
3.1 Problem Formulation	63
3.2 Reformulation in the Robust Control Framework	64
3.3 Robust Optimization Algorithms	79
3.4 Structure Exploiting Algorithms	91
3.5 Discussions	95
3.6 Summary and Conclusion	103
4 Summary and Conclusion	105
A Notation and Technical Background	109
A.1 Basic Notation	109
A.2 Basics of Graph Theory	110
A.3 Lie Brackets and Formal Brackets	111
A.4 Sequence Spaces and (Linear) Operators	113
A.5 Convex Functions and Memoryless Monotone Operators	115
A.6 Some Facts Involving Linear Matrix Inequalities (LMIs)	117
B Proofs	119
B.1 Proofs of Chapter 2	119
B.2 Proofs of Chapter 3	124

C Additional Material	135
C.1 Additional Material to Chapter 2	135
C.2 Additional Material to Chapter 3	140
List of Symbols	147
Bibliography	151
