Contents

Notation **VII**

1 Introduction **1**
1.1 Background 1
1.2 Related Work 3
1.3 Motivation 6
1.4 Outline and Contributions 8

2 Analysis of Cooperative Manipulation Systems **13**
2.1 Kinematics of the Multi-Robot Manipulation System 13
2.1.1 Description of the Cooperative Manipulation Scenario 14
2.1.2 Forward and Differential Kinematics of Individual Manipulators . 15
2.1.3 Holonomic and Non-Holonomic Constraints 17
2.2 Dynamics of the Multi-Robot Manipulation System 18
2.3 Internal Joint-Space Performance 20
2.3.1 Influence of Individual Internal Performance on Cooperation . . . 20
2.3.2 Characterisation of Internal Performance Aspects 32
2.4 Summary 36

3 Indirect Optimisation Strategy for Cooperative Manipulation **37**
3.1 Local optimal control reference 38
3.1.1 Formulation of local optimisation problem 38
3.1.2 Analytical solution of optimal joint velocity 41
3.1.3 Conversion of optimal velocity into position level 42
3.2 Coordination strategy by negotiation 44
3.3 Summary 48

4 Direct Optimisation Strategy for Cooperative Manipulation **51**
4.1 Formulation of global optimisation problem 51
4.1.1 Transportation error cost 52
4.1.2 Internal constraint violation cost 53
4.1.3 Obstacle cost 56

4.2 Distributed solution to the global problem . . . 58
4.2.1 Primal decomposition algorithm . . . 58
4.2.2 Non-iterative algorithm . . . 62
4.3 Summary . . . 64

5 Compliant Robot Motion Control 67
5.1 Joint impedance control . . . 67
5.2 Cartesian impedance control . . . 69
5.3 Null space control . . . 71
5.4 Summary . . . 73

6 Simulation and Experiments with Indirect Distributed Optimisation 75
6.1 Simulation . . . 75
6.1.1 Simulation set-up . . . 76
6.1.2 Simulation result . . . 77
6.2 Experiments . . . 81
6.2.1 Experimental setup . . . 81
6.2.2 Experiment results . . . 83
6.3 Summary . . . 93

7 Experiments with Direct Distributed Optimisation 95
7.1 Experimental setup . . . 95
7.2 Experiment results . . . 98
7.2.1 Experiment results with coordination turned off versus on . . . 98
7.2.2 Experiment results with internal optimisation turned off versus on 107
7.2.3 Experiment results with moving goal . . . 112
7.2.4 Experiment results with constrained DOFs . . . 120
7.3 Summary . . . 123

8 Conclusion and Outlook 125
8.1 Conclusion . . . 125
8.2 Outlook . . . 127

Appendices 129

Appendix A Computation of Orientation Error 131

Appendix B Analytical Inverse Kinematics for Franka Emika Panda 133

Bibliography 147
